

AV-Q7T0K-TE

January 2004

Dear customer:

HP Disk File Optimizer (DFO) for OpenVMS V2.8 runs on OpenVMS VAX versions 6.2, 7.1, 7.2 and 7.3, and OpenVMS Alpha versions 6.2, 7.1-2, 7.2-1, 7.2-2, 7.3, 7.3-1 and 7.3-2. DFO is no longer supported on OpenVMS VAX version 5.5-2.

Through customer feedback and suggestions, the Disk File Optimizer software continues to improve.

The main purpose of DFO V2.8 is to extend the compatibility of our product to include the new release of OpenVMS 7.3-2 and to update our general DFO audience with current bug fixes. See release notes for listing.

Contents of this Kit:

- Disk File Optimizer (DFO) V2.8 software for OpenVMS VAX and Alpha systems.
  - DFO V2.8 documentation:
  - Guide to Operations
  - Release Notes
  - Installation Guide

Thank you for your continued interest in our Disk File Optimizer product.

Sincerely,

OpenVMS Product Management
